Authorship

I certify that I have made substantial contributions to (1) the conception and design or analysis and interpretation of data; (2) drafting or revising the manuscript critically for important intellectual content; and (3) final approval of the version to be published. All three of these conditions must be met. I further certify that I have participated sufficiently to take public responsibility for the work. I understand that acquisition of funding, collection of data, or general supervision of the research group by itself would not justify a claim of authorship. I affirm that the manuscript submitted is original and that neither this manuscript nor one with substantially similar content under my authorship has been published, nor is any such manuscript under consideration for publication elsewhere, except as described in an attachment. I understand that any report of secondary analyses of data sets should specify the source of the data.

I believe that the manuscript represents valid work. I have reviewed the final version of the submitted manuscript and approve it for publication. If requested, I will produce the data on which the manuscript is based for examination by the Editors or their designees.
